SUMMARY

TypeScript Engineer with 3 years of experience architecting scalable SaaS platforms and Web3 infrastructure. Proven track record of designing high-performance automation engines, AI-driven workflows, and secure, non-custodial multi-chain billing protocols. Expert in building end-to-end, type-safe software solutions from concept to production.

WORK EXPERIENCE

Chief Technology Officer | Clinic Lead Stack (Taipei, Taiwan — Remote) Jan 2023 - Present

- Architected and developed an automated marketing and patient acquisition platform using TypeScript, enabling healthcare practices to automate social media lead funnels.
- Engineered multi-channel automation workflows, including a custom Instagram post/reel scheduler and an automated direct messaging (DM) handler that securely converts social media engagement into 20+ booked clinical consultations per week.
- Designed and integrated an AI-driven content generation engine alongside a real-time, high-performance appointment booking system, scaling operations to seamlessly support 8 active clinics and automatically publish 200+ marketing assets monthly.

Founding Full Stack Engineer | BillingBase (Canada — Remote) Nov 2025 - Jan 2026

- Architected a non-custodial Web3 billing protocol using TypeScript to automate stablecoin payments and multi-chain subscriptions across Base, Polygon, and Arbitrum.
- Engineered robust infrastructure featuring 5-tier retry logic, automated webhooks, and a frictionless compliance system ("RiskService") for real-time wallet sanctions screening.

Frontend Developer | Blue Marvel Capital (UK — Remote) Mar 2025 - July 2025

- Architected X-Scrape, a TypeScript-based automation platform enabling scheduled, multi-platform content distribution across X, Threads, and Instagram based on user configurations.
- Engineered an AI orchestration engine and high-accuracy scheduling subsystem that adapts content to custom brand voices while managing concurrent publishing pipelines within API rate limits.

Full Stack Developer - Virtuous Tech Solutions LTD, Nigeria (Remote) Oct 2024 - Present

- Engineered a headless CMS platform for Comobi.co.uk using TypeScript and Sanity.io, establishing a structured content pipeline and modular design system for streamlined operational updates.
 - Developed the web presence for the Emmanuel Igbinovia Foundation, building an optimized, responsive user interface to drive global engagement for youth empowerment initiatives.
-

EDUCATION

Bachelor of Science in Computer Science

Aug 2020 - Jan 2025

ADDITIONAL INFORMATION

- Programming Languages: JavaScript, TypeScript, SQL, HTML, CSS.
- Frameworks & Libraries: React, React Native, Next.js, Node.js, Express, Tailwind CSS, MongoDB, Supabase.
- Front-end, Back-end, Mobile Development, and API design.
- Web and mobile application performance optimization.
